EXPERIENCE

Front End Engineer - *Indicative*   **Jul 2018 - present**
- Designed and implemented new query builder interface functionality to support intuitive application of logic across complex combinations of clauses
- Built out table framework across variety of query tools to support new composable functionality, including column resizing, sorting, and inversion
- Improved bug management process and took charge of incoming error diagnosis, priority categorization, and solution execution
- Rebuilt onboarding UI to better align with free tier pivot, including one-click integrations with third-party data services and redesigned tutorials
- Enriched Javascript SDK with new data types and automatic event properties, added dynamic code snippets to onboarding UI for simplified integration

Full Stack Engineer - *Well Traveled*   **Jul 2017 - Jun 2018**
- Ingested existing raw site data and built automated system for future input
- Integrated demographic data streams from marketing partnership
- Built out client-facing analytics dashboards to support new data types
- Iterated internal dashboard tools for client activity management
- Migrated site visit data from third-party service and developed internal API

Data Engineer - *Voter Gravity*   **Feb 2013 - Jan 2014**
- Managed team of eight developers in agile environment
- Oversaw acquisition and implementation of over 140 million voter files
- Spearheaded negotiations for $100k consumer data purchase
- Overhauled database structure to complement new application functionality

SKILLS

JavaScript	React	Redux	Node.js	Ruby	Rails	SQL
Angular.js	D3.js	Flux	Express	HTML/CSS	Git	MongoDB

EDUCATION

App Academy - *Full-Stack Web Development*   **Summer 2016**
- Intensive web development training program with less than 3% acceptance
- Emphasizes pair programming, Test Driven Development, and best practices

Saint Peter's University - *Mathematics*   **Jan 2009 - June 2010**

Stevens Institute of Technology - *Computer Science*   **Sep 2004 - Dec 2008**
